PROJECTS

Wedding Website, *Full Stack Developer* - React | Node   [Live](#) | [GitHub Repo](#)
A comprehensive wedding platform was built with guest management, registries, comments, song requests, and photo uploads, offering seamless user experiences.
- Developed a feature-rich platform for seamless wedding information to guests. Implemented guest lists, registries, comments, song requests, and photo uploads. Enabled user registration, login, and profile updates.
- Utilized a combination of JavaScript, CSS, HTML, React, and Node.js to develop engaging and responsive websites.

SnowLFB, an AirBnb Clone, *Full Stack Developer* - React | Node   [Live](#) | [GitHub Repo](#)
Developed a user-friendly Airbnb clone with React, Node.js, and SQL, incorporating features like property administration, reservations, testimonials, and photo uploads.
- Developed a full-stack clone using React, Node.js, and SQL. The clone included features such as listing and booking properties, and providing customer support.
- Seamless platform was developed, incorporating features like property management, bookings, reviews, messaging, and photo uploads, ensuring a smooth user experience.

Spork, a Tumblr Clone, *Full Stack Developer* - Python | Flask   [Live](#) | [GitHub Repo](#)
Developed a user-friendly Tumblr clone incorporating features like post creation, customization options, social interactions, and media uploads.
- The clone included features such as listing and booking properties, and providing customer support.
- Developed a seamless platform, inspired by Tumblr, incorporating features like blog management, post creation and editing, user interactions, messaging, and media uploads, ensuring an enjoyable user experience.
- Developed a full-stack clone using Python and Flask. The clone included features such as user authentication, blog management, post creation and editing, reblogging, likes, comments, and customizable themes.
